Experience

UX Designer Intern | YITU Tech

Apr 2017 - July 2017

Designed features for three new versions of web based YITU Dragonfly Eye™ Intelligent Security System used by China's public security systems.

Produced a facial recognition demo used on ATM for showing to Singaporean customers.

Came up with an internal Design newsletter template for sharing values of user experience and design with all colleagues in the company, raising the awareness of user-centered design process.

Student Designer | Dongyue Studio in SJTU

May 2015 - June 2017

Worked on a university-sponsored project Tongqu that is an open platform for organizing, finding and joining activities in SJTU. Open for both official activities and non-official ones

Designed Tongqu's new release for iOS and most of the Android's release and collaborated with developers to and ship them to app stores.

Created a new website for the Hui-Chun Chin and Tsung Dao Lee Endowment Program

Design Assistant Intern | HUAWEI

June 2016 - June 2016

Worked as short-term intern in HUAWEI's Industrial Design Department to study the design methods and application.

Took part in the concept design of a cellphone case for an African country's Education Department

Volunteer | UXPA China

Jan 2014 - Dec 2014

Collaborated with other members to conduct the Annual User Experience Industry Research and published the report. I mainly worked on the brainstorm, framework development, interviews' transcription and analysis and report design.

Projects

WiW | ID@XBOX Campus Game Dev. Competition

Feb 2017 - June 2017

A Kinect game designed for increasing the physical and emotional interaction between parents and kids, couples, friends and other users.

Magic of Love | Microsoft Penta-Hackathon

Dec 2016 (24 hours)

A game based on Leap Motion's gesture capture and speech recognition for making the traditional fairy tales become a more interactive and entertaining adventure which makes the children could learn from their own choices.
